<input type="checkbox"/> Industrial	<input type="checkbox"/> Detached Accessory Structure	<hr/>

Erosion and Sediment Controls are required when disturbing land in Johnson County. A "Land Disturbing Activity" is any activity that changes the physical conditions of land form, vegetation and hydrology, creates bare soil, or otherwise may cause Erosion or Sedimentation. Such activities include, but are not limited to, clearing, removal of vegetation, stripping, grading, grubbing, excavating, filling, logging and storing of materials.

When determining the total amount of land your project will disturb you must include *all* areas in your calculation. These include but are not limited to building sites, accessory structures, pools, ponds, driveways and septic fields.

The undersigned represents that the total amount of Land Disturbance associated with the project identified above at _____
 (Property/Project Address) _____
 _____ will not exceed one (1) acre in size.

The undersigned requests Johnson County determine that this project is exempt from obtaining a **Johnson County Land Disturbance Permit**. The undersigned understands that Johnson County has made this determination based on the information provided by the undersigned. Johnson County retains the rights to rescind this determination and require a Land Disturbance Permit to be obtained for this project due to unforeseen conditions or project changes resulting in a land disturbance equaling or exceeding one acre.

The undersigned acknowledges and agrees to install erosion and sediment controls according to the document "**Erosion and Sediment Control Standards for Building Construction that Disturbs Less Than One Acre for Unincorporated Area of Johnson County**." The undersigned agrees that these erosion and sediment control measures may be inspected by Johnson County and if such measures are found to be unacceptable building inspections may be withheld, a stop work order may be imposed, or other penalties may apply.
