Licensing**

**REQUEST FOR EDUCATION ACCREDITATION**

Application for Non-Code Credit Course

**CLASS INFORMATION**

Class Title: Use of special sprinklers in Combustible Concealed Attic Spaces

Non-Code classes must meet all Committee Defined Criteria and must fall under at least one Construction Science or Core Criteria as specified in the current "Non-code Education Guidelines" document.

Construction Science or Core Criteria Installation of Fire Sprinklers

6a. Construction Methods and Materials b. Methods of building construction and erection; materials used in building; building system technology

Instructor: Mark Fressendorf

Attach instructor's detailed resume or complete pages 2 and 3.

and linking up with like-minded advocates in their region, course attendees can better promote their business, counter sprinkler opponents, and underscore a technology designed to save lives.

**Speakers: Fred Durso & Jeffery Hudson**

**1.5 CPD; Contact Hours 1.5 Hours; 0.15 CEU**

### **Testing: Fire Pump Acceptance and NFPA 25**

Fire pumps are a critical part of an automatic sprinkler system. NFPA 20 and NFPA 25 provide requirements on the initial acceptance testing and periodic testing of this vital system component. This session will look at the difference between the acceptance test and the "post-occupancy" periodic tests. This program will look at answering important questions including how do I pretest my pump so that I pass my acceptance test with the AHJ and what are the different periodic tests I should be trained to execute.

**Speakers: Matt Klaus; P.E. Bob Caputo; CFPS, CET**

**1.5 CPD; Contact Hours 1.5 Hours; 0.15 CEU**

### **The Untold Stories of New Product Developments**

New technologies are never a slam dun success, there are many untold stories of the how and why new technologies come about. Most people do not realize that new and creative thinking is not readily accepted in the traditional prescriptive industry we participate in. Residential, Extra Large Orifice, Specific Application and CMSA will stimulate audience participation. Join this session and participate with your questions and thoughts.

**Speaker: James Gollinveaux**

**1.5 CPD; Contact Hours 1.5 Hours; .15 CEU**

### **The Use of Special Sprinklers in Combustible Concealed Attic Spaces.**

Fire sprinkler protection for attic spaces represents a unique challenge – both in sprinkler placement and fire control. Quite often unique challenges are best addressed by the use of specific application sprinklers. This program is intended to familiarize a participant with these challenges and present information on protection option using both standard spray and specific application sprinklers.

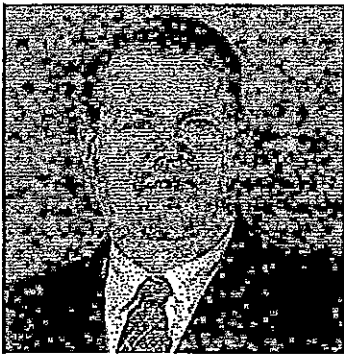

**Speaker: Mark Fessenden**

**4.0 CPD; Contact Hours 4 Hours; 0.4 CEU**

**What's Eating Your Pipes? – How Corrosion Can Cause Your Sprinkler System to Fail and How to Fight It.**

## James Fantauzzi

James M. Fantauzzi is the president, owner and founder of North East Fire Protection Systems, Inc. since 1978. North East Fire designs, fabricates and installs fire sprinkler systems in New York and surrounding States. He earned his bachelor of science in Biology from Marist College in Poughkeepsie NY. He has been in the sprinkler business since 1971 and a member of AFSA since 1984. In his 33 years with the AFSA, Jim has served as a TAC committee member since 1985 and was the Chairman of the TAC for 6 years, as well as a board member for the AFSA for six years in the early 90's. In addition to his service with the AFSA, Jim is a NFPA 25 committee member since its inception in 1990. He currently serves as a NFPA 13 Technical member for the Sprinkler System Discharge Criteria committee.

**Mark Fessenden**

Mark Fessenden is Director of Industry Relations for Tyco Fire Products/Jonson Controls Inc. In his 20+ year career with the organization, Mark has spent most of that time in Technical Support & Training functions, and has represented the organization on numerous NFPA and Industry Technical Committees. Mark has an undergraduate degree in Mechanical Engineering Technology from New England Institute of Technology and an MBA from Corban University. He is certified by the National Institute for Certification in Engineering Technologies in Water-Based Systems Layout & Special Hazards Suppression Systems.

## Jason Gill

Jason Gill is a Contract Sales Representative and Project Manager for Fire & Life Safety America, Richmond, Va. He has 20 years of experience in the sprinkler industry as a designer, design manager, estimator and project manager. Gill holds a NICET Level IV certification in Water-Based Fire Protection Systems Layout and is a Sprinkler System Installation committee member for NFPA 13.

**James Golinveaux**

James E. Golinveaux is a former senior fellow of Water Suppression Products for Tyco Fire Suppression & Building Products. With 34 years of experience in the fire protection industry including both contracting and manufacturing, Mr. Golinveaux is currently the President / CEO of Viking Group, Inc.. He currently holds 12 US Patent families in Automatic Sprinkler Technologies. He is a past member or the Board of Trustees for the Fire Protection Research Foundation, as well as multiple other Boards and Councils including the Factory Mutual Advisory, AFSA, NFSA, International Fire Sprinkler Association and the Fire Sprinkler Association of Brazil. Mr. Golinveaux is also a subject matter expert for past two editions

### \* NFPA 13: Installation Changes to the 2016 Edition *Call*

This program will address significant technical changes in the 2016 edition of NFPA 13 (from the 2013 edition) with explanation of the reason for each change. Participants will understand where and why each technical change was considered and how addressed by the technical committee. This program should appeal to sprinkler designers, estimators, and engineers, fire code officials and plan reviewers.

Speaker: Bob Caputo

2 CPD; Contact Hours 2 Hours; .2 CEU

### \* NFPA 13R: Changes to the 2016 edition PLUS IBC Applications *Call*

This seminar will explore the changes to the 2016 edition of NFPA 13R, Standard for the Installation of Sprinkler Systems in Low-Rise Residential Occupancies. Included will be a discussion regarding the clarifications for sprinkler protection of buildings with residential and mixed occupancies as modified in the 2016 edition. Other important changes for corridors in conjunction with the 2015 International Building Code (IBC) will be presented. Finally, upcoming modifications to the 2018 edition of the IBC for protection of attics resulting from the spectacular conflagration of the AvalonBay apartment complex in Edgewater, New Jersey will be examined. This is a must attend class for sprinkler contractors active in the NFPA 13R residential market.

Speaker: Pete Schwab

2.0 CPD; Contact Hours 2 Hours; 0.2 CEU

### \* The Use of Special Sprinklers in Combustible Concealed Attic Spaces. *IBC - Code*

Fire sprinkler protection for attic spaces represents a unique challenge – both in sprinkler placement and fire control. Quite often unique challenges are best addressed by the use of specific application sprinklers. This program is intended to familiarize a participant with these challenges and present information on protection option using both standard spray and specific application sprinklers.

of the Society of Fire Protection Engineers (SFPE) serving on the Board of Directors, holds the grade of Fellow in the Institute of Fire Engineers (IFE), is an active member of the American Water Works Association (AWWA) sitting on the Fire Protection Subcommittee of Distribution Systems, and is a member of the American Society of Mechanical Engineers (ASME), a member of the American Society of Heating, Refrigeration, and Air-Conditioning Engineers (ASHRAE), and is non-voting member of the International Code Council (ICC). Mr. Campbell is a licensed professional engineer in all 50 US States, the District of Columbia, the US Territories of Puerto Rico, Guam, and Northern Mariana Islands, and in the Canadian Provinces of Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland and Labrador, Nova Scotia, Ontario, and Saskatchewan.

### **Bob Caputo, CFPS, CET**

Bob Caputo, Executive Vice President of the Compliance Solutions Division at Telgian Corporation, is Chairman of the NFPA 16 Technical Committee and a member of multiple NFPA committees including NFPA 13 and NFPA 25. Bob is a contributor of the NFPA 13 and NFPA 25 Handbooks, and the NFPA Inspection Manual. A senior member of NFPA and AFSA faculties, Bob has written and presented seminars throughout the world on fire protection and life safety systems. He is a regular speaker at NFPA and AFSA annual conventions and is the author of AFSA's Project Management Tools program. He was named San Diego County "Fire Prevention Officer of the Year" in 1994 and Fire Protection Contractor Magazine's Person of the Year in 1997. Bob attended the University of Albuquerque, NM, and is a U.S. Navy veteran.

### **Fred Durso**

Fred Durso oversees all NFPA communications activities for the organization's Fire Sprinkler Initiative, aimed at increasing the acceptance of home fire sprinklers in new dwellings. In his current role, Fred creates content for the Fire Sprinkler initiative website, blog, and newsletter while assisting safety professionals across North America with their advocacy efforts. Fred joined NFPA in 2010 as staff writer for NFPA Journal, the association's magazine, and has penned feature stories, profiles, and other news pieces highlighting NFPA's reach. Fred has been working in the communications field for more than a decade, and his writing has been honored by the Association Media and Publishing, the Pennsylvania Newspaper Association, and the Philadelphia Press Association. Fred is also a Disaster Action Team volunteer for the American Red Cross of Massachusetts and frequently witnesses the devastation caused by home fires. I would likely be presenting with one of NFPA's regional sprinkler specialists, who can speak eloquently on NFPA 13D and the state fire sprinkler coalition movement.

them. He does this by staying true to two simple values in everything that he does.. Inspire & Empower! Tru's background and experience include co-founding qualitative research agency Y-Access, and Millennial & Lifestyle marketing businesses Alloy Access and Octagon Access respectively, all of which were acquired by larger organizations both public and private. Tru has been featured in such prominent publications as The New York Times, USA Today, The Boston Globe, and Fortune Magazine for his marketing expertise. His highly anticipated book, Millennials Revealed was released in October 2015 with overwhelming positive response and feedback from thought leaders across the country. Tru currently lives in Cary, North Carolina with his wife of 14 years, Tameka, and their 4-year-old son Austin.

### Terry Victor

Terry Victor, Manager of Industry Relations at SimplexGrinnell, has over 44 years of technical experience in the sprinkler industry. He is NICET certified Level IV in Water Based Systems Layout and Special Hazards Systems Layout. He serves on various industry boards and committees including the AFAA Codes and Standards Committee and is the current chairman of the Capital Region Fire Sprinkler Association. He is the Tyco Regional Coordinator for Codes & Standards in the US and is a member of numerous NFPA technical committees including those for NFPA 3, 4, 13, 13D, 13R, 14, 15, 16, 20, 25, 72, 101, 214, 232, 303, 5000 and the Correlating Committee on Building Codes. He received the NFPA Committee Service Award in 2015.

### Pete Schwab

Pete Schwab is the Vice President of Engineering Technologies and Purchasing at Wayne Automatic Fire Sprinklers. Wayne Automatic is one of the largest residential fire protection contractors in the southeast United States. Pete currently holds Fire Protection Contractor Licenses for Wayne Automatic in the following states: Florida, South Carolina, Alabama, Mississippi, Louisiana and Texas. Pete has been actively employed in the fire sprinkler industry since 1987 and has been with Wayne Automatic since 1990. He has experience as an installer, design technician, manager as well as his current role as Vice President. Pete is Level IV Nicet certified in Water Based Systems Layout, Level III in Special Hazards Suppression Systems and Level II in Inspection and Testing of Water Based Systems. Pete serves on multiple NFPA committees responsible for the following NFPA documents: NFPA 13D & NFPA 13R, (Residential Sprinkler Committee) NFPA 13 (Installation Committee, Discharge Committee & the Hanging and Bracing Committee) NFPA 14 (Standpipe Committee), and NFPA 24 & 291 (Underground Piping Committee). Pete was also a contributor for handbook commentary for the 2016 editions of NFPA 13 and NFPA 13R.

His highly anticipated book, Millennials Revealed was released in October 2015 with overwhelming positive response and feedback from thought leaders across the country. Tru currently lives in Cary, North Carolina with his wife of 14 years, Tameka, and their 4-year-old son Austin.

### Terry Victor

Terry Victor, Manager of Industry Relations at SimplexGrinnell, has over 44 years of technical experience in the sprinkler industry. He is NICET certified Level IV in Water Based Systems Layout and Special Hazards Systems Layout. He serves on various industry boards and committees including the AFAA Codes and Standards Committee and is the current chairman of the Capital Region Fire Sprinkler Association. He is the Tyco Regional Coordinator for Codes & Standards in the US and is a member of numerous NFPA technical committees including those for NFPA 3, 4, 13, 13D, 13R, 14, 15, 16, 20, 25, 72, 101, 214, 232, 303, 5000 and the Correlating Committee on Building Codes. He received the NFPA Committee Service Award in 2015.

### Pete Schwab

Pete Schwab is the Vice President of Engineering Technologies and Purchasing at Wayne Automatic Fire Sprinklers. Wayne Automatic is one of the largest residential fire protection contractors in the southeast United States. Pete currently holds Fire Protection Contractor Licenses for Wayne Automatic in the following states: Florida, South Carolina, Alabama, Mississippi, Louisiana and Texas. Pete has been actively employed in the fire sprinkler industry since 1987 and has been with Wayne Automatic since 1990. He has experience as an installer, design technician, manager as well as his current role as Vice President. Pete is Level IV Nicet certified in Water Based Systems Layout, Level III in Special Hazards Suppression Systems and Level II in Inspection and Testing of Water Based Systems. Pete serves on multiple NFPA committees responsible for the following NFPA documents: NFPA 13D & NFPA 13R, (Residential Sprinkler Committee) NFPA 13 (Installation Committee, Discharge Committee & the Hanging and Bracing Committee) NFPA 14 (Standpipe Committee), and NFPA 24 & 291 (Underground Piping Committee). Pete was also a contributor for handbook commentary for the 2016 editions of NFPA 13 and NFPA 13R.
