

FACT:

If each person in Greater Kansas City started driving one less mile per week, in one month, the air we breathe would have 35,574 fewer pounds of smog-forming pollutants.

Clear Air. Clear Thinking. It's in your hands.

The photographs above are actual images of our downtown on good and poor air quality days.

Sixty percent of all smog-forming pollutants come from the everyday activities of the approximately 1.8 million people living in our region.
