

Characteristics of the Poor in Johnson County

Unlike poverty rates, the percentages on this page tell us the portion of the poor that have certain characteristics. For example in 2012, of all the people with income below 100% of the federal poverty level 32% were under age 18, 61% were between 18 and 64, and 7% were over age 65. The percentages add to 100 and represent all the people with income below the poverty level.

While the number of poor has more than doubled in Johnson County, the characteristics have remained relatively stable. **When compared to suburbs across the country, Johnson County is very similar. Notable differences are a larger portion of the poor in Johnson County are white-non-Hispanic, are working and are college educated.**

	Johnson County *		In All U.S. Suburbs**
