

Wastewater

Industrial Pretreatment Program

Solvent Management Plan

ANNUAL REVIEW - 2019

Company Name: _____

Requirements specified in Part III of the Industrial Wastewater Discharge Permit issued to this company state that in lieu of routine monitoring for total toxic organics (TTO), an industry may submit a Solvent Management Plan to Johnson County Wastewater. Upon acceptance, the industry may certify, via their Self-Monitoring Reports, that concentrated toxic organics are not being discharged to the sanitary sewerage system. A review of the Plan on file with Johnson County Wastewater has been performed by this company. The following statement reflects the finding of the review.

The Solvent Management Plan was determined to be: **(Check One)**

- Current and is being implemented at this facility.
- No longer current and is in the process of being revised. A revised Plan will be provided to Johnson County Wastewater upon completion.
- Revised and is being implemented at this facility. The revised Plan is enclosed.
