

# 2020 Preventive Medication List

## Brands and Generics

Your pharmacy benefit plan includes coverage before your deductible has been met for certain preventive medications. You may or may not have a copay for these medications. These drugs help protect against or manage a medical condition. Preventive drugs are intended to maintain your quality of life and keep you from developing other health conditions.

This is a listing of the most commonly prescribed preventive drugs. The list is not all-inclusive and is subject to change. It also does not account for drugs which are excluded and/or limited by your specific plan design and/or formulary. For questions regarding medications not listed or other pharmacy related inquiries, please call MedTrakRx at 800-771-4648
